

Using Oracle

1. For event requests, list the event number, event date (*eventrequest.dateheld*), and count of the event plans. Only include event requests in the result if the event request has more than one related event plan with a work date in December 2013.

```
select eventrequest.eventno, dateheld, count(*) as CountEventPlans
  from eventrequest, eventplan
 where eventrequest.eventno = eventplan.eventno
        and workdate between '1-DEC-13' and '31-DEC-13'
 group by eventrequest.eventno, dateheld
 having count(*)>1;
```
