

Using Oracle

2. Insert a new row in the *Location* table related to the *Facility* row in modification problem 1. The new row should have “Door” for the location name.

insert into location

(locno, facno, locname)

values ('L107','F104','Door');

Screenshot 1: Execution of statement

The screenshot shows the SQL Developer interface with the 'Query Result' tab active. The SQL editor contains the statement: 'select * from location;'. The results are displayed in a table with 8 rows. The status bar indicates 'All Rows Fetched: 8 in 0 seconds'.

	LOCNO	FACNO	LOCNAME
1	L107	F104	Door
2	L100	F100	Locker room
3	L101	F100	Plaza
4	L102	F100	Vehicle gate
5	L103	F101	Locker room
6	L104	F100	Ticket Booth
7	L105	F101	Gate
8	L106	F100	Pedestrian gate
