

Using Oracle

2. List the name, department, phone number, and email address of employees with a phone number beginning with "3-".

```
select empname, department, phone, email
```

```
from employee
```

```
where phone like '3-%';
```

The screenshot shows an Oracle SQL interface. At the top, the query is entered: `select empname, department, phone, email from employee where phone like '3-%';`. Below the query editor, the execution status is displayed: "All Rows Fetched: 3 in 0.016 seconds". The results are shown in a table with four columns: EMPNAME, DEPARTMENT, PHONE, and EMAIL. The table contains three rows of data.

	EMPNAME	DEPARTMENT	PHONE	EMAIL
1	Chuck Coordinator	Administration	3-1111	chuck@colorado.edu
2	Sally Supervisor	Planning	3-2222	sally@colorado.edu
3	Alan Administrator	Administration	3-3333	alan@colorado.edu
