Solution 5

There are missing values for:

- CustomerZip as the Special Events worksheet does not contain the value for zip code for the event. This missing value may be determined using the location from CorporateCustomerName&Location.
- CustomerEmail is missing for events from the Special Events worksheet and can be compensated with additional requirement collection, if necessary.
- MemTypeName is also missing from the Special Events worksheet and for the guest members and if necessary it can be collected additionally.
- CustomerLocation is missing for the Member table but an idea can be formed from the zipcode.
- MmbrDate is missing from the Special Events worksheet and also for some guest members and needs additional information.
